✌ Hello connection!!

7th Day: #devops #challenge by Shubham Londhe

☑ **Day 7/90**
After the Basic of the Linux, Today is our seventh day, we are discussing the **docker** & **jenkins installation on AWS**:

Today's challenge is a interesting as well as challenging. Personally, I faces many challenges when the installation of the jenkins on cloud.

I personally #recommend you to learn the installation of jenkins on aws cloud at once and if you already knows about this concept then atleast #follow and comment for #cfbr
